

Crowne Plaza Adelaide

LED REFURBISHMENT

Originally opened in August 2010, Crowne Plaza Adelaide in Hindmarsh Square required an LED lamp refurbishment to cut down on massive energy consumption. Middy's TechEnergy were called in to replace the existing standard halogen downlights with 1250 LED downlights. This resulted in an overall wattage saving of 47,500 for the entire building and 38 watts per lamp. This resulted in an 80% energy consumption saving and a 6 month return on investment.
