

Billy & Nicole Slater

HOME AUTOMATION & SOLAR INSTALLATION

Middy's helped Billy & Nicole Slater create an eco friendly, smart home with up to date modern technology

Controlled via nero app on any smart device

Former professional rugby league footballer, Billy Slater and his wife Nicole chose Middy's to help them create an eco friendly, smart home with up to date modern technology after a recommendation from their trusted electrician Mitch from Hayes Power. Mitch works on a lot of high-end, modern homes and uses Middy's whenever he can because of their great products and service.

The Middy's TechEnergy team worked with Mitch to install an Environexus Nero Home Automation System. This included lighting control, smart security, blind and climate control, energy management and a SONOS Audio System, with voice control, wireless installation and remote access and monitoring. The plan also included the installation of an LG Neon[®]2 325kW Solar Power System with Edge Conx Energy Monitoring System.

The entire process was seamless with Nick Baker from Middy's assisting Hayes Power to explain all of the products involved in the installation and the way in which they work. After the installation was completed, Nick then demonstrated the simplicity of the products' use illustrating how the system is controlled via the Nero app on their smart devices from anywhere they have wifi.

The ability to set up the system to activate prior to arrival at the property was a key requirement that the Middy's TechEnergy team helped Hayes Power to meet. Billy and Nicole can now set the heating/cooling to come on, have the lights on in key areas of the house when they arrive home late and an automated garage door opens as they pull up in the driveway, making their newly automated home very user friendly, meeting their expectations and matching their lifestyle.

THE INSTALL: ALL CONTROLLED VIA NERO APP

CLIMATE CONTROL

SONOS AUDIO SYSTEM

GARAGE DOOR OPENER

CEILING FANS & BLINDS

LIGHTING CONTROL

SECURITY & ACCESS CONTROL

Nero by Environexus

- ▶ Monitors and controls energy consumption
- ▶ Controls the mood and ambience of your home
